

## **STUDENT RESULT MANAGEMENT SYSTEM (SRMS)**

**COURSE CODE: SEN201**

**COURSE TITLE: SOFTWARE ENGINEERING**

**DEPARTMENT: COMPUTER SCIENCE**

**LEVEL: 200 LEVEL**

### **STUDENT INFORMATION**

Name: David Emmanuel Enenche

Matric Number: 24/13723

---

### **ABSTRACT**

This project implements a Student Result Management System that allows administrators to manage students, courses, and results digitally.

#### **1. INTRODUCTION**

The SRMS is a web-based system designed to store and display student academic results.

#### **2. SDLC MODEL**

The Waterfall Model was used for system development.

#### **3. REQUIREMENT ANALYSIS**

The system must add students, courses, results, and view results.

#### **4. SYSTEM DESIGN**

Three main tables were designed: Students, Courses, and Results.

#### **5. IMPLEMENTATION**

The system was implemented using HTML, CSS, and JavaScript.

#### **6. TESTING**

All system functions were tested successfully.

#### **7. DEPLOYMENT**

The system was deployed using GitHub Pages.

## **8. MAINTENANCE**

Future improvements include authentication and database integration.

---

## **CONCLUSION**

The Student Result Management System successfully meets the project requirements.
